Vijilan Security Passes Audit Demonstrating Cybersecurity Abilities

Company achieved sustained compliance with regulations and cybersecurity guidelines

AVENTURA, FL, UNITED STATES, July 22, 2022 /EINPresswire.com/ -- Following an audit, A-LIGN, which examines technology companies worldwide to ensure they achieve sustained compliance with regulations and cybersecurity guidelines, has confirmed Vijilan Security passed its System and Organization Controls (SOC 2) audit.

Vijilan is a leading security monitoring company that offers an end-to-end solution to businesses of any size.

The A-LIGN examination, which was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, stated in part, "the controls stated in the description were suitably designed as of June 1, 2022, to provide reasonable assurance that Vijilan's service commitments and system requirements would be achieved based on the applicable trust services criteria…"

Kevin Nejad, the CEO of Vijilan, said, the audit demonstrates "trust and respect to our stakeholders and that we can mitigate cybersecurity risks. Our clients can experience peace of mind with a reliable, top-tier security solution."

SOC compliance is the most popular form of a cybersecurity audit, used by a rapidly growing number of organizations to demonstrate they take cybersecurity and privacy seriously.

In the SOC 2 audit, A-LIGN reviewed Vijilan's policies, procedures and systems that protect information across five categories called Trust Services Criteria (Security, Availability, Processing Integrity, Confidentiality, Privacy). As an independent SOC 2 auditor, A-LIGN evaluated the evidence Vijilan supplied for the controls in each category, resulting in a SOC 2 report.
