Market Trends:

There is currently significant growth in the oil and gas industry around the world. This, in confluence with the rising shale gas production, represents one of the key factors bolstering the growth of the market. Apart from this, there is an increase in the demand for LPG tankers worldwide on account of the rising sales of heating, ventilation, and air condition (HVAC) systems. Moreover, LPG is increasingly being used as feedstock in the manufacturing of petrochemicals and fertilizers. Besides this, the market is also driven by technological advancements undertaken by leading players to expand their market reach.
