A pacifier is a soothing device that is widely utilized to comfort and entertain toddlers. It includes a nipple, guard and ring, that are commonly made from natural, soft and flexible materials, such as latex, rubber and silicone. Also known as teethingers, dummies and soothers, these devices assist babies by relieving stress and preventing them from crying.

Market Trends:

The global market is primarily driven by the increasing awareness regarding the importance of good-quality baby accessories. This is further supported by the inflating disposable income levels of the masses and their changing lifestyle preferences. Moreover, the introduction of innovative baby pacifiers, such as personalized product variants designed according to the age of the toddler, is also creating a positive outlook for the market. Some of the other factors contributing to the market growth include rapid urbanization, the increasing global birth rate and the easy product availability through online and offline organized retail channels.
