The automotive logistics market consists of sales of automotive logistic services by entities (organizations, sole traders, and partnerships) that refer to a set of activities conducted for the smooth transportation of automotive spare parts and finished vehicles. Automotive logistics consists of inbound procurement, outsourcing & distribution of spare parts, and transportation of finished vehicles domestically or internationally. The complexity of the supply chain of automotive logistics requires process planning to achieve maximum efficiency in manufacturing.

## Global Automotive Logistics Market Trends

New product innovations have emerged as the new trend gaining popularity in the market. According to the automotive logistics market overview, major companies are focused on developing innovative products to sustain their position in the market. For instance, In March 2021 Tata motors, an India-based company that manufactures automobile logistic trucks launched Ultra Sleek T-Series trucks based on smart truck technology. This contains a varied deck length from 10 to 20 feet to adapt to all the required applications. This helps to carry more automotive logistics at a time.
