By type, the chemical segment held nearly one-third of the total share of the total market share in 2018, and is anticipated to retain its dominance by the end of 2026. At the same time, the mechanical segment is projected to grow at the fastest CAGR of 7.0% during 2019–2026. The biological segment is also assessed in the report.

By pest type, the insects segment accounted for nearly two-fifths of the total market revenue in 2018, and is expected to dominate throughout the forecast period. The rodents segment, on the other hand, would manifest the fastest CAGR of 7.6% by 2026. The termites segment is also analyzed in the market report.

According to the report, the global pest management services market was estimated at \$11.8 billion in 2018, and is expected to reach \$19.0 billion by 2026, growing at a CAGR of 6.25% from 2019 to 2026. The report offers a detailed analysis of the drivers & opportunities, top investment

pockets, top winning strategies, market size & estimations, competitive scenario, and changing market trends.

Frequent changes in climatic conditions, presence of many governing bodies across Europe, and ease in availability of pest management products are the major factors driving the growth of the global pest management services market. On the other hand, health threats related to pest control chemicals curtail down the growth to some extent. However, arrival of organic chemicals in pest management practices is expected to create multiple opportunities in the near future.
