

Educators Empowered with Tools for Life to Improve Education

150 educators learn crucial skills needed to boost the education system in South Africa from Scientology Volunteer Ministers.

MIDRAND, GAUTENG, SOUTH AFRICA, July 26, 2022 /EINPresswire.com/ -- Recently, another 150 educators and teachers attended a Learner Support Professional Development Workshop for Educators and Parents at the [Castle Kyalami](#) in Midrand to learn crucial skills needed to boost the education system in South Africa.

Educators and Teachers from all levels going through the training brochure

Desperate for solutions, the teachers all came together to see if there are actual solutions to learner support education... to their great amazement, they found out there are. Included in the attendance were teachers from pre-school to high school as well as officials from the Gauteng Department of Education, National

Department of Higher Education, and an entire group from one of the Gauteng public colleges, all craving to find out.

“

I am one hundred percent on board with this program! We as teachers don't even take the time to understand our students! And we are lacking effective teaching methods!"

Ms. Thobile Mhlongo - Higher Education and Training

They were taken through presentations of several tools which laid out the three main barriers to learning, which, when known, can help any youngsters learn and apply everything they have learned. Discovered by L. Ron Hubbard, this practical learning tool officially known as "[Study Technology](#)" has worldwide recognition. They were also taken through the [Tools For Life](#) program to learn other crucial skills such as communication, conflict resolution, how to achieve your goals, and more provided

in this program.

The showing of the presentation had the entire room fully attentive, eyes stuck to the screen like

obedient students and the feedback afterward was extraordinarily heartfelt as educators confessed how their current teaching methods and attitudes contribute to learning difficulties.

“How come we have never been taught these skills before?” exclaimed one of the educators. “I just finished my degree to be able to teach and this seminar was just something else! Yet it makes so much sense. This will change my entire way to teach and help my students. I am so excited!!!”

Sandile Hlayisi, a representative of the learner support program from the Scientology Volunteer Ministers, said “I could see that teachers could have hope to help their students as well as themselves with the practical Tools for life provided for in this seminar,” Nonhlanhla Tsematse, a Life Orientation Program Coordinator for the Gauteng Department of Education said “The way you presented the seminar to us is exactly the way we need to conduct our training in the Life Orientation program. Your presentation is so interactive and this is what we are lacking. Your content is also amazing – everyone needs these skills!” She further commented, “Today I found my solution!”

Ms. Thobile Mhlongo, a Life Orientation and Inclusion Specialist for the Department of Higher Education and Training, was full of praise for the seminar and said “I am one hundred percent on board with this program! We as teachers don’t even take the time to understand our students! And we are lacking effective teaching methods! How are we supposed to make our students understand under such circumstances? This program is going to equip us with the teaching techniques we need to help ANY student understand and apply what he is studying!”

At the end of the workshop, the teachers all shared heartfelt sentiments and many commented

all the attendees gathered for a group picture after a successful Learner Support Professional Development Workshop for Educators and Parents

Video presentations have the teacher's eyes glued to the screen

on a new sense of rekindled purpose and the love of education and passion to help that so many of them had originally entered the teaching profession with.

“I am very happy that more educators attended this second seminar of its kind, we are planning to do this monthly in order to assist as many educators as possible. It is a privilege to be working with them because they do so much for the country and any support we can provide will be done indefinitely”. Concluded Mr. Hlayisi.

In view of the success of the previous seminars, many more will be held to accommodate an ever-growing number of educators reaching to get practical knowledge.
