The global preoperative surgical planning software market was valued at $84.09 million in 2018, and is projected to reach $126.81 million by 2026, registering a CAGR of 5.2% from 2019 to 2026. North America is anticipated to be the highest revenue contributor throughout the forecast period.

Surgical planning is the pre-operative procedure of pre-visualizing a surgical intervention to define the surgical steps and furthermore to analyze bone segment repositioning in the context

of the outcome of surgery. This software is used to manage the orthopedic surgery, which makes surgeons design their plans proficiently.

Surge in geriatric population, increase in the cases of orthopedic surgeries, and technological advancements associated with the software are the principal drivers of the preoperative surgical planning software market. However, lack of awareness about this software in developing countries and considerable product recalls impede the growth of this market. Conversely, the untapped potential of emerging markets is poised to offer stellar growth opportunities to the market players during the forecast period.

Which market perspectives are enlightened in the Preoperative Surgical Planning Software market report?

Executive Summary: It covers a summary of the most vital studies, the Worldwide Preoperative Surgical Planning Software market increasing rate, modest circumstances, market trends, drivers and problems as well as macroscopic pointers.

Study Analysis: This covers major players, vital market segments, the scope of the products offered in the Preoperative Surgical Planning Software market, the years measured and the study points.

Competitive Analysis: In this segment each player is screened based on a products, services, value, SWOT analysis, growth and other significant features.

Geographic Analysis: This Preoperative Surgical Planning Software market report analyses data on the basis of production, sales, imports & exports, and key players in all regional markets.

Preoperative Surgical Planning Software Market Segments and Sub-segments::

Preoperative Surgical Planning Software Market by Key Players: Brainlab AG, WishBone Medical, Inc., Stryker Corporation (Scopis), EchoPixel, Inc. , Intrasense, GE Healthcare, Siemens Aktiengesellschaft, Koninklijke Philips N.V., Canon Inc., Hologic, Inc., Hitachi, Ltd., Agfa-Gevaert Group, Zimmer Biomet Holdings, Inc., Medtronic Plc, MeVis Medical Solutions AG, Carestream Health, Materialise, IBM Watson Health (IBM), Monteris Medical, Inc., Oracle NetSuite, Danaher Corporation, Medicad Hectec, Pie Medical Imaging B.V., Renishaw Plc, Nemotec, HIPOP-PLAN and Johnson and Johnson.

Preoperative Surgical Planning Software Market By Type: Off-premise and On-premise

Preoperative Surgical Planning Software Market By Application: Orthopedic Surgery [General Orthopedic Surgery, Deformity Correction, Fracture Management, and Joint Reconstruction], Neurosurgery, Dental & Orthodontics Application, and Others

Preoperative Surgical Planning Software Market By End User: Hospitals, Orthopedic Clinics, and Rehabilitation Centers
