COVID-19 scenario:

- The outbreak of the COVID-19 pandemic led to have a positive impact on the growth of the global software-defined data center market. The exponential integration of big data was the primary driver of industry development. Researchers employed technologies such as big data and machine learning.
- Big data aided in the analysis of datasets and the identification of trends that aided in COVID-19 detection. This has become one of the major growth factors for the software-defined data center market during the global health crisis.
