Ventilators are used in hospitals and day care centers to provide continuous oxygen when a COPD patient is unconscious or uncomfortable due to breathing problems. The US portable ventilator market is projected to grow due to increase in COPD incidence and increase in hospitalization due to emphasis on home care.

COVID-19 Impact Analysis:

This pandemic has disrupted growth in many economies across various domains. The COVID-19 outbreak is anticipated to impact the growth of the portable ventilator market. A ventilator is one of the primary devices used for COVID-19 treatment. The demand for medical ventilators for COVID-19 has increased exponentially, forcing numerous manufacturers to raise their production by 30% to 50%. Around 77,000 new ventilators were expected to be required to meet global demand in 2019. For instance, several major players namely Getinge AB, GE Healthcare,

Hamilton Medical, Philips, Medtronic, and Smiths Group are pushing for the development and distribution of as many ventilators as possible around the globe to increase the production of hospital ventilators to ramp up the battle of COVID-19 pandemic.

Technological advances in microprocessor-controlled ventilation combined with the complexity of new ventilator modes have opened up a variety of opportunities for the multidisciplinary team in health care to improve the care of critically ill ventilator patients.

Advanced ventilators are also designed for any kind of emergency situation and there are many checks and balances in place. Patient-specific parameters such as air pressure, air volume, flow velocity and general parameters such as air leakage, mechanical failure, power failure, battery backup, oxygen tanks and remote control are all equipped with sensors and monitors. This will further boost the growth of the portable ventilator market.

The demand for health facilities providing long-term care for chronic respiratory conditions is projected to be driven by a growing geriatric population base requiring long-term ventilation. The growth in the portable market is expected to increase by the growing need for emergency care for prolonged illnesses and prolonged treatment associated with lung diseases in children as well as adults.

As per the statistics by the National Cancer Institute, around 9.5 million individuals were reported to be suffering from cancer in the U.S. in 2019, and this number is expected to increase to 19 million in 2024. This is expected to increase the need of cancer pain drugs for therapeutic purposes, thus fueling the market growth.

The U.S. portable ventilators market is segmented on the basis of mode, interface, age group, and end user. On the basis of mode, it is classified into pressure-mode ventilation, volume-mode ventilation, and others. On the basis of interface, the market is divided into invasive ventilator and non-invasive ventilator. On the basis of age group, the market is categorized into pediatric & neonatal, adult and geriatric. By end user, it is segmented into hospital and clinic, home care, and ambulatory care centers.

Key findings:

- The study provides an in-depth analysis of the U.S. portable ventilator market, with current trends and future estimations to elucidate the imminent investment pockets.
- Quantitative analysis from 2019 to 2027 is expected to enable the stakeholders to capitalize on prevailing market opportunities.
- The portable ventilator market size and estimations are based on a comprehensive analysis of

key developments in the industry.

- Extensive analysis is conducted by closely following key product positioning and monitoring the top contenders within the market framework.

Key players in the market:

- Becton, Dickinson And Company (Carefusion/ Vyair Medical Inc.)
- Draegerwerk Ag & Co. Kga
- Getinge Ab
- Hamilton Medical Ag
- Koninklijke Philips N.V.
- Medtronic Plc. (Covidien Ltd.)
- Percussionaire Corp.
- Smiths Group Plc.
- Resmed Inc.
- Zoll Medical Corporation

Key market segments:

[Biosensors Market](#)

[Bowel Management Systems Market](#)

We also Offers Regional and Country Reports:

- North America Portable Ventilators Market
- Japan Portable Ventilators Market
- South Korea Portable Ventilators Market
- Singapore Portable Ventilators Market
- Australia Portable Ventilators Market
- Europe Portable Ventilators Market

Company Profile:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP, based in Portland, Oregon. AMR provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

AMR introduces its online premium subscription-based library Avenue, designed specifically to offer cost-effective, one-stop solution for enterprises, investors, and universities. With Avenue, subscribers can avail an entire repository of reports on more than 2,000 niche industries and more than 12,000 company profiles. Moreover, users can get an online access to quantitative and qualitative data in PDF and Excel formats along with analyst support, customization, and updated versions of reports.
