customers. According to the binders and scaffolders for meat and meat substitutes industry analysis, cellular-based agriculture is a new technique that allows meat and other agricultural products to be made from cells in a fermenter or bioreactor instead of from farm animals. It has various advantages such as less environmental repercussions, a safer, purer product, and a more consistent supply. For instance, in September 2021, Givaudan, Buhler, and Migros formed a new company, the Cultured Food Innovation Hub, that operates on cell culture and bio-fermentation capabilities. The company attracted an investment of \$700 million which results in generating more demand for the product using this technology.
