The study on the Global Dialysis Market is the latest report covering the impact analysis of the currently ongoing COVID-19 pandemic. The pandemic has directly affected the market by causing disruptions in the global supply chains and indirectly by inducing financial difficulties. The Dialysis Market has witnessed dynamic changes in trends and demands owing to the ongoing COVID-19 pandemic. The report provides a detailed outlook on how the pandemic has affected the key segments of the Dialysis Market industry.

This survey provides answers to the following important questions:

What is the expected growth rate of the Dialysis Market? What is the market size for the forecast period from 2022 to 2030?

What are the main drivers of changing the course of the industry?

Who are the major vendors dominating the Dialysis Market industry in different regions? What are their winning strategies to stay ahead of the competition?

What are the market trends for Dialysis Market that business owners can trust in the next few years?

What are the threats and challenges that are expected to limit the progress of Dialysis Market industry in different countries?

What are the main opportunities available to employers during the forecast period from 2022 to 2030 ?

Some Key Highlights from the Report :

The hemodialysis segment is expected to account for a significantly large revenue share during the forecast period. The relative ease of performing the procedure and minimal invasion make it a preferable mode of dialysis for patients undergoing dialysis. The procedure involves removal of blood from the patient through an intravenous needle and filter it by passing it through a dialyzing filter before pumping it back into the patient. Presence of medical professionals during hemodialysis for assistance has increased adoption of the procedure among patients, and is expected to boost revenue growth of the segment over the coming years.

The software and services segment accounted for moderate revenue share in 2021. Increasing dependence of geriatric and aged patients for assisted dialysis procedures is driving revenue growth of this segment. Assisted peritoneal dialysis services have been implemented and offered in many countries in Europe. Companies have developed Electronic Medical Records (EMRs) in recent years in order to make dialysis procedures more accessible and easy for

patients.
