

Digital Hands Partners with SentinelOne to Accelerate Detection and Response for Zero-Day and Advanced Attacks

Digital Hands partners with SentinelOne, an autonomous cybersecurity platform company and Gartner Magic Quadrant Leader for Endpoint Protection Platforms.

TAMPA, FLORIDA, UNITED STATES, July 27, 2022 /EINPresswire.com/ -- Today, Digital Hands announces a strategic partnership with SentinelOne (NYSE: S), an autonomous cybersecurity platform company and 2021 Gartner Magic Quadrant Leader for Endpoint Protection Platforms. Digital Hands' world-class CyGuard Maestro™ security fabric and security operations center (SOC), combined with SentinelOne's innovative Singularity XDR Platform provides industry-leading extended detection and response:

“

We're proud that Digital Hands has selected SentinelOne as a strategic partner to help their customers detect and respond to cyber threats autonomously at machine speed.”

*Brandon Andrews, VP
Worldwide MSSP, SentinelOne*

Zero-Day countermeasures such as SentinelOne's Rollback feature will provide customers the ability to return an endpoint to its last known good state. SentinelOne's powerful forensic analytics allow for comprehensive insight into all endpoints so that responses can be prioritized. This supports Digital Hands' "Get There First™" mission with significant time savings from an investigation and response standpoint. SentinelOne's API-first designed platform allows Digital Hands to use CyGuard Maestro™ to its full potential and respond to threats autonomously.

“The Digital Hands ethos is to 'Get There First,' which is

founded on detecting and responding to threats as early in the kill chain as possible. I am excited about the partnership with SentinelOne as our combined strength via our CyGuard Maestro™

platform, SentinelOne's Singularity Technology, in conjunction with the human expertise of our world-class SOC, makes it possible to respond to threats in seconds," said Dewayne Alford, Vice President of security operations at Digital Hands.

Digital Hands has a wealth of experience in the managed threat detection and response business, providing advanced endpoint protection security operations services for enterprise clients for over two decades. They are competitively positioned to provide advanced extended detection and response (XDR) services beyond the traditional monitoring, alerting and managed endpoint detection and response available today by most providers.

"We're proud that Digital Hands has selected SentinelOne as a strategic partner to help their customers detect and respond to cyber threats autonomously at machine speed," said Brandon Andrews, VP Worldwide MSSP, SentinelOne. "Digital Hands has a proven 20-year track record providing managed endpoint detection and response at machine speed and has invested in building world-class integration between our solutions. Our partnership with Digital Hands demonstrates SentinelOne's commitment to building partner-first go-to-market offerings, helping organizations transform cybersecurity through cutting-edge automation."

"As a modern Security Operations provider committed to protecting our customers from the rising tide of cybercrime, Digital Hands maintains a relentless focus on using the best technologies available to prevent, detect and respond to the bad guys at machine speed," says Charlotte Kibert, Chief Customer Officer at Digital Hands. "SentinelOne's incredible detection and response technology allows our SOC to use our CyGuard Maestro platform's powerful integration and automation capabilities across a broad threat surface to deliver critical security outcomes at speed."

Enterprise security teams face an onslaught of rapidly evolving threats and Digital Hands' CyGuard® solutions deliver superior threat detection and ruthlessly effective response. Safeguard your organization with enhanced endpoint protection and autonomous response at machine speed. Get There First™ with the only cybersecurity solution powered by Cyguard Maestro™, SentinelOne, and backed by Digital Hands security analysts.
