

Packaged Sunflower Seeds Market Share, Size, Growth, Outlook and Forecast 2022-27

According to the latest report by IMARC Group, The global packaged sunflower seeds market is expected to exhibit a CAGR of XX% during 2022-2027.

SHERIDAN, WYOMING, UNITED STATES, July 28, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled, "Packaged Sunflower Seeds Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027", offers a comprehensive analysis of the industry, which comprises insights on the [global packaged sunflower seeds market](#). The report also includes competitor and regional analysis, and contemporary advancements in the market. The global packaged sunflower seeds market is expected to exhibit a CAGR of XX% during 2022-2027.

Sunflower seeds are conical fruits from the composite-flower family of *Helianthus annuus*. They are usually packed in woven bags made from jute or plastic that avoid the substance from solar radiation, and heat as the high fiber content, and oil percentage can cause the seeds to undergo self-heating during transportation. There is an expanding demand for packaged sunflower seeds that maintain the product's quality for making green fodder and processing oil.

Market Trends:

The expanding food and beverages sector is augmenting the demand for sunflower seeds for preparing numerous confectionery and bakery items. Furthermore, the growing consumer awareness towards numerous health benefits of sunflower seeds due to the high content of vitamins, magnesium, omega-6 fatty acids, etc., is also driving the market growth. In line with this, sunflower seeds also help in reducing muscle spasms, slowing down the aging process, promoting heart health, and minimizing the risk of cancer, diabetes, osteoarthritis, etc., thereby experiencing a high demand. Additionally, the growing adoption of packaged sunflower seeds for animal feed is also acting as another growth-inducing factor. Besides this, the increasing demand for sunflower seed oil in biodiesel production to reduce carbon emissions will further propel the global market in the coming years.
