

Bottled Water Market 2022 - 2028 : A surging inclination towards bottled water and the growth of eco-friendly packing

Market Size - '218.24 billion in 2020, Market Growth – CAGR of 11.4%, Market Trends

NEW YORK CITY, NEW YORK, USA, July 28, 2022 /EINPresswire.com/ -- The global [Bottled Water Market](#) is expected to be valued at USD 506.55 billion by 2028 from USD 218.24 Billion in 2020, registering a CAGR of 11.4% through the forecast period. The

exponential expansion of the market can be accredited to the augmenting consciousness about the advantages of bottled water for health, availability of different flavors, and convenience of use. Bottled water can either be carbonated or not and is available in plastic and glass packaging. The increasing apprehension about the nutritional benefits conferred by bottled water has propelled its use among the younger generation, in turn, driving the market growth.

The escalating inclination towards the bottled water has also led to numerous restaurants offering packaged water to cater to the growing consumer demand. Furthermore, the stringent regulatory policies laid down by the FDA for bottled water have increased the confidence of consumers on such products. The advent of the COVID-19 pandemic also acted as a market growth factor as the demand for bottled water saw a massive surge in the initial phase of the pandemic with widespread lockdowns, increasing consciousness about health, and stockpiling attitude among the consumers.

The surging increase of the health and wellness trend among the consumers has also added to the market expansion. However, the environmental and health risks associated with the use of bottled water may potentially impede market growth. The inefficient recycling of plastic bottles and the increasing amount of energy used during processing and shipping are key market restraining factors. Moreover, high operational costs of the manufacturing units are also projected to impede the market expansion during the projected timeframe.
