## Market Trends and Drivers:

High levels of automation in the food processing industry are one of the main drivers of market expansion. Cooking robots are used by many food service companies in the North American continent to automate tasks including frying, baking, and dressing. This helps these businesses increase operational effectiveness while reducing the need for manual labour. The need for cooking robots in the area is also being positively impacted by the growing number of food trucks, drive-ins, and quick-service restaurants (QSRs), which see strong client influxes throughout the day. Additionally, the growing popularity of "ghost kitchens" or "virtual kitchens,"

particularly in the United States and Canada, is anticipated to support market expansion.
