

United States Green Packaging Market Overview, Trends, Growth, Demand and Forecast 2026

SHERIDAN, WYOMING, UNITED STATES, July 29, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[United States Green Packaging Market: Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)," the united states green packaging market is expected to continue its moderate growth in the forecast period (2021-2026).

United States Green Packaging Market Report

Green packaging uses specific production methods to reduce environmental damage and is a sustainable packaging solution. Styrofoam, bioplastics, recycled paper, and many other recyclable and biodegradable materials are used in the production of green packaging products. Green packaging offers better flexibility, variety, and easier disposal than the synthetic packaging that is typically employed. These packaging materials are widely utilised in a variety of industries, including food and beverage, healthcare, personal care, etc., as a result of their advantages.

Covid-19 Scenario: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Market Trends and Drivers:

The United States green packaging market is currently being driven by the escalating environmental concerns and shifting customer preferences toward smaller, lighter, and eco-friendly packaging options. Furthermore, the use of alternative packaging, such as paper and aluminium foil, is being encouraged by the introduction of strict government rules aimed at

reducing the use of plastics. Additionally, the demand for the product is being increased by the increasing use of reusable materials for packaging processed and ready-to-eat food products. In addition, intensive research and development efforts have resulted in the development of fresh and cutting-edge green packaging materials, like bio-based polymers. The market growth in the next years is then predicted to be further strengthened by this.

United States Green Packaging Market 2021-2026 Analysis and Segmentation:

The report has segmented the market on the basis on region, packaging type, end use industry.

Breakup by Packaging Type:

Recycled Content Packaging

- Paper
- Plastic
- Metal
- Glass
- Others

Reusable Packaging

- Drum
- Plastic Container
- Others

Degradable Packaging

Breakup by End Use Industry:

- Food Industry
- Beverage Industry
- Healthcare Industry
- Personal Care Industry
- Others

Breakup by Region:

- Northeast
- Midwest
- South
- West
