Market Overview:

The pharma and healthcare industry is at a crossroads. Patients are benefiting from the promise of cell and gene therapies; uncommon diseases that were previously thought to be incurable are on the verge of finding true treatments. Artificial intelligence (AI) and machine-learning technologies are creating hopes that therapy discovery and development would be more innovative, as well as faster and cheaper. Manufacturing, the supply chain, and the entire healthcare ecosystem all have the potential to benefit from data-driven initiatives. Consumer attitudes and behaviours are shifting in a variety of ways, from growing use of technology and willingness to share data to an interest in using tools to make prescription and treatment decisions. Such factors will drive pharma and healthcare market growth in the coming years.
