The growth in value sales for chicken flavor is attributable to surge in demand for quick service restaurants, and fast food chains, which facilitate better taste. Thus, increase in willingness of customers for different tastes in food industry is expected to fuel the chicken flavor market demand.

The food industry has been evolving in terms of innovations and demand. Manufacturers focus on key innovations that cater to the requirements of their target consumers. Furthermore, increase in awareness toward health and wellness has been witnessed among people residing in developed as well as developing countries. The opportunities in the emerged economies are huge, as they are untapped. Non-member nations of the Organization for Economic Co-operation and Development (OECD) comprise more than 80% of the global population; yet consume less than 60% of world's food consumption. The emerging economies constitute a

population of more than 60% of today's global population of the middle class by 2020. Considering the pace of change, in China, around 3 million households had a disposable income of around \$10,000 in 2,000, which increased to 60 million in 2012. This number is expected to exceed to 230 million by 2020. Thus, rise in demand from developing economies significantly drives the chicken flavor market growth.

However, studies have shown the adverse effects of aforementioned chemicals on thyroid, RNA, and enzymes. Artificial ingredients cause numerous problems, such as dizziness, nervous system depression, chest pain, fatigue, allergies, headaches, brain damage, nausea, and seizures. Some popular flavors can lead to tumors, genetic defects, and bladder cancer. These factors are expected to hamper the growth of global chicken flavor market. Thus, different governments across the globe have set up regulatory guidelines to regulate the global food flavor market. Such regulations, especially in Europe and North America, have led to massive growth of the food flavor industry, particularly synthetic flavors. There are regulations regarding the raw materials, their processing, ingredients used, and labelling of these products. These factors are expected to restrain the growth of the global chicken flavor market.

There has been an increase in number of users in various social media sites with rise in internet penetration. Taking this into consideration, most of the key players in the chicken flavor market strategize on promoting their products on these social media platforms. Thus, through social media marketing strategy, chicken flavor market opportunity in gaining traction mainly in the B2C segment.
