

# Mold Removal in South Florida: How Ediss Mold Remediation Can Help

*Ediss Mold Remediation Keeps Homeowners Safe from Mold All Year Round*

DANIA BEACH , FLORIDA , UNITED STATES , August 6, 2022 /EINPresswire.com/ -- According to the Centers for Disease Control and Prevention ([CDC](#)), [mold in the home can cause a variety of health problems in people](#). Some of the most common mold and black mold symptoms include respiratory problems, eye irritation, and skin irritation, and other chronic ailments. Mold is a type of fungus that thrives in damp, humid conditions that frequent in areas such as South Florida. Mold and black mold infestations can enter the home through open doors, windows, vents, and cracks in the foundation and once inside, mold will begin to grow and spread quickly.

Every year, an estimated 7 million deaths are attributed to indoor and outdoor air pollution and a staggering 4.6 million individuals live with asthma caused by dampness and mold exposure in the

home. With such dangerous symptoms and health risks, mold problems in the home must be fixed quickly with thorough mold remediation services. Studies have repeatedly shown that the longer mold goes untreated, the worse the problem will become and the greater the risks. In

many cases, people exposed to mold in the home can develop lifelong diseases such as asthma from breathing in mold spores.
