/EINPresswire.com/ -- According to IMARC Group's latest report, titled "[Cloud System Management Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast](#)

2022-2027", the global cloud system management market reached a value of US\$ 12.2 Billion in 2021. Cloud system management represents a web-based solution that is utilized for the monitoring, configuration, setup, and optimization of cloud infrastructure. It is deployed in an existing cloud environment that comprises a database and a server. The server communicates with application programming interfaces (APIs) to connect the database and virtual resources on the cloud. It involves performance monitoring of the components, security, compliance, disaster recovery, etc. Cloud system management is also used for storing the organization's data on an offsite server. As a result, it finds extensive applications across numerous industries, such as banking, financial services and insurance (BFSI), healthcare, IT and telecommunications, etc.

The expanding information technology (IT) industry across the globe is one of the key factors driving the cloud system management market. Moreover, the increasing adoption of public, private, and hybrid cloud environments is also propelling the market growth. Besides this, due to the sudden outbreak of the COVID-19 pandemic, a rising number of organizations are adopting remote working models, which is further catalyzing the product demand. Additionally, numerous technological advancements, including the development of artificial intelligence (AI)-based tools for cloud management, are also augmenting the market growth. Various other factors, such as Software-as-a-Service (SaaS)-based delivery models and extensive research and development

(R&D) activities, are expected to fuel the cloud system management market over the forecasted period. Looking forward, IMARC Group expects the cloud system management market to reach US\$ 44.0 Billion by 2027, exhibiting a CAGR of 24.4% during 2022-2027.
