

# Lucky Penny Candles Introduces Custom Photo Candle Option

*Personal candle pioneers offer an easy way to make a lasting impression.*

VENICE, FLORIDA, UNITED STATES, August 1, 2022 /EINPresswire.com/ -- [Lucky Penny Candles](https://www.luckypennycandles.com) is proud to announce the latest enhancement to its popular custom candle service. Customers are now able to include photographs along with the custom messages and choice of fragrance that have made Lucky Penny a resounding success across North America.

Custom Photo Candle Showcase Image

A picture is worth a thousand words, and a picture gracing personalized gift is worth even more. Lucky Penny customers can now embrace their creativity and create meaningful gifts for family and friends with a custom photo and written message on a handmade, eco-friendly candle.

Some gifts are fleeting reminders that it's the thought that counts. Personalized candles continue to remind us that we are valued every time we light the wick. And the sentiment lasts even after the wax burns out: empty candle jars can be upcycled into beautiful and useful vases or containers.

Building a personalized [photo candle](https://www.luckypennycandles.com) on the Lucky Penny website is quick and easy. Customers can add any photo they choose and add any message they wish, by going to <http://www.luckypennycandles.com> and following these simple steps:

1. Choose your fragrance
2. Add a custom photo and write a message for your recipient to treasure
3. Add a personal message
4. Choose your lid color

Lucky Penny's new customization options do not change the company's commitment to environmental sustainability in their long-lasting, clean-burning candles. "Our photo candles

meet the same stringent criteria for sustainability as the rest of our line,” says company founder Dom Leroux. “Lucky Penny Candles are made and labeled by hand in the USA using soy blend wax, non-toxic fragrances, and cotton wicks free of lead and zinc. Every one of our products is free from hazardous chemicals and substances.”
