The business analytics & enterprise software market consists of sales of business analytics and enterprise software by entities (organizations, sole traders and partnerships) that produce business analytics and enterprise software designed to analyze business data to better understand an organization's strengths and weaknesses. Enterprise software is a software used to satisfy the needs of an organization rather than individual users. Such organizations include businesses, schools, interest-based user groups, clubs, charities, and governments.

Global [Business Analytics & Enterprise Software Market Trends](#)

According to the business analytics & enterprise software market analysis, over the past five years there has been an increasing prevalence of low cost open source alternatives. Open source has become a preferred platform for developing new technology. In the past, software product companies would open source software that was not making money, but now companies are open sourcing software to increase its presence and share in the market. According to Allison
