

# Fertilizers Market Insights | Global Outlook During 2022 - 28 by Key Players: Haifa Group, Nutrien Ltd, Bunge Limited.

*Long-term market expansion is anticipated to be fueled by technological advancements in the sector as well as rising consumer demand for N, P, and K fertilizers*

LONDON , UNITED KINGDOM, August 2, 2022 /EINPresswire.com/ -- The global [fertilizer market size](#) was valued at USD 195.6 billion in 2021 and is poised to grow at a significant CAGR of 2.1% during the forecast period 2022-28. Plant tissues or soil are treated with natural and synthetic fertilizers to supply one or more nutrients that plants need to flourish. Over the projected period, it is anticipated that increased agricultural output and growing demand for improved soil nutrients will further raise fertilizer demand. Farmers should be encouraged to utilize fertilizers more effectively and safely as organic fertilizers become increasingly widespread.

## The Fertilizer Market - Growth Factors

Numerous governmental and non-governmental groups are promoting fertilizer use and its beneficial effects on agricultural output throughout the world. It is anticipated that the fertilizer market will gain from the promotion of fertilizers through radio, television, or in rural areas. Additionally, it is anticipated that increased credit availability and rising rural incomes will increase revenue generation. Lack of knowledge about fertilizer use is detrimental to both soil health and human health. In order to increase production, farmers choose to abuse fertilizers, which is bad for the environment. The human body is negatively impacted by the lack of

personal safety gear for handling as well as applying fertilizers.

**The Fertilizer Market Segmentation:**  
Fertilizers Market on the basis of Type, the market is segregated into Organic Fertilizers, Inorganic Fertilizers, and Bio-Fertilizers. On the basis of Form Type, the market is divided into Granules, Liquid, Gaseous, and Others. On the basis of Method of Application, the market is segmented into Foliar Spraying, Fertigation, Sowing, Broadcasting, Spraying, Drip Method, and Others. On the basis of Crop Type, the market is categorized into Horticulture Crops, Cash Crops, Cereals, [Turfs and Ornamental](#), Crops Plantation, Crops, and Others.

Market trends for Fertilizer Market:

- Chemical ingredients included in fertilizers, which can be natural or synthetic, help plants grow and produce more.
- Fertilizers may increase the soil's inherent fertility or replenish the chemical ingredients that previous crops removed from the soil. Fertilizers with nitrogen, potash, and phosphate are examples of contemporary fertilizers.

**The Fertilizer Market Regional Analysis**

With a market share of 43% in 2020, Asia-Pacific (APAC) was the market leader for fertilizers, followed by North America and Europe. Rice is a significant nitrogen-consuming crop in Asia. Growing worries about the region's current fertilizer usage patterns, heavy reliance on nitrogen fertilizers, subpar nutritional management, a dearth of additional information, declining soil fertility, and inadequate marketing and distribution systems have all become significant roadblocks to increasing fertilizer efficiency. These worries are now being replaced by the growth and support of the regional fertilizer market provided by biofertilizers and micronutrient fertilizers.
