North America Fire Extinguisher Market

A fire extinguisher is a fire protection apparatus that discharges gas, foam, water or other materials for putting out small fires. It consists of a nozzle, handle, pressure gauge and a cylinder that has an extinguishing agent. It is generally installed at various fire points in schools, factories, buildings, and other public spaces. Nowadays, different types of fire extinguishers like dry chemical, carbon dioxide (CO₂), and foam-based extinguishers are widely available across the North American region.
