NEW YORK CITY, NEW YORK, UNITED STATES, August 3, 2022

/EINPresswire.com/ -- The growing demand for geomembranes from the water & wastewater management industry is expected to drive the market growth over the forecast period 2022-2031.

Geomembranes are impermeable membranes used for lining and covering landfills, ponds, canals, and other constructed worksites where liquid seepage needs to be prevented. They are majorly used in applications requiring containment of hazardous and non-hazardous waste, such as municipal solid waste, chemical waste, and mining tailings. The market for geomembranes is expected to witness significant growth due to the rapid industrialization and urbanization across the globe.
