

# Wound Care Market Growth, Global Survey, Analysis, Share, Company Profiles by 2027

*The growth of the wound care market is driven by the increasing incidences of diabetes and its prevalence and increasing wound ulcer prevalence.*

VANCOUVER, BC, CANADA, August 3, 2022 /EINPresswire.com/ -- The Global [Wound Care Market Report](#), published by Emergen Research, offers an industry-wide assessment of the Wound Care market, which is inclusive of the most crucial factors contributing to the growth of the industry. The

latest research report comprises an extensive analysis of the micro- and macro-economic indicators that influence the global market development during the forecast period of 2020-2027. According to our team experts, the global Wound Care market is projected to deliver a magnificent CAGR of 4.5% throughout the forecast timeframe to rise from USD 19.72 Billion in 2020 to USD 28.15 Billion in 2027.

However, prohibitive costs of the market products, which often undermine the affordability of treatment, will, in the foreseeable future, hinder industry growth. Impaired or delayed healing of the wound in chronic diseases, as well as after surgical procedures, poses a serious threat to patients and puts them at risk of infection, amputation, and death. The rising geriatric population base at high risk of chronic wounds will support the demand for the wound care market. An increasing pool of patients suffering from chronic injuries results in significant cost burdens on healthcare systems across the globe. It is predicted that the existing and rising cost burden of these chronic wounds will drive investment in wound care technology that will have a significant positive impact on the growth of the wound care industry. However, prohibitive costs of the market products, which often undermine the affordability of treatment, will, in the foreseeable future, hinder industry growth. Impaired or delayed healing of the wound in chronic diseases, as well as after surgical procedures, poses a serious threat to patients and puts them at risk of infection, amputation, and death.
