Caffeine Anhydrous Overview :-

The global caffeine anhydrous market is expected to register a robust revenue CAGR of 5.3% between 2022 and 2030. Factors such as rising demand for functional beverages and increasing health consciousness among consumers are expected to drive market revenue growth during

the forecast period. In addition, growing use of caffeine anhydrous as a dietary supplement, which is among the top-selling products currently, is expected to continue to drive revenue growth of the market to a significant extent. Scientists claim that the molecule has potential health benefits such as, improving memory, alertness, and focus. Caffeine anhydrous is also being used for treating conditions such as Parkinson's disease, headaches, and obesity. Moreover, caffeine anhydrous has anti-oxidant, anti-inflammatory and anti-ageing properties due to which it is being used to manufacture cosmetics and personal care product such as lotions and creams. Rapid growth of the cosmetics and personal care product industries globally, and rising awareness regarding benefits of using caffeine anhydrous-based products among companies and consumers are leading to higher demand for caffeine anhydrous, thereby driving revenue growth of the market.

Factors restraining revenue growth of the market are stringent regulations by FDA and other health authorities, and possible side effects of caffeine anhydrous such as anxiety and insomnia.
