“

The global demand for smart sports equipment is expected to increase due to the advancement in its features and specification which a user won't endure while using traditional sports equipment.”

Shankar Bhandalkar

The global smart sports equipment market size was valued at \$6.6 billion in 2018 and is projected to reach \$12.0 billion by 2026, registering a CAGR of 7.9% from 2019 to 2026.

Smart sports equipment are the sports equipment in which device like sensors are connected to them. These smart equipment are different from traditional sports equipment in terms of features. Unlike traditional sports equipment, these smart sports equipment are able to provide useful analytics such as the speed, spin, and the

flight path of a ball. These smart sports equipment are also able to gather data and provides players with advice on how they can improve their techniques. For instance, FWD powersot is a

wearable sensor that is connected to a hockey stick and allows users to track and analyze their performance. It compiles all the metrics and provides advice to the user on how to improve their techniques. Thus, it also serves as virtual coaching to the players.
