Covid-19 impact:

Manufacturing activities of Windows and Doors halted due to implementation of stringent lockdown. To prevent the spread of coronavirus, governments across every nation made social distancing compulsory, due to which, market players faced shortage of labor force. Moreover, restrictions in import & export activities led to supply chain disruptions which further resulted to shortage of raw materials. This in turn, created challenges in carrying out manufacturing in full capacity. Also, most of the construction projects were either delayed or cancelled, especially in the initial stage of the pandemic.

On the basis of material type, the windows & doors market is segmented into wood, metal, and plastic. Metal segment dominated the doors segment owing to its thermal insulation properties, high strength, strong aesthetics, and high utility of this material in the interior doors segment. The residential segment is anticipated to witness increased usage in light commercial & institutional applications, and is anticipated to show the [highest growth rate](#).
