

Assisted Reproductive Technology Market Growing Rapidly with Latest Trend and Future scope with Top Key Players

Excessive alcohol consumption, smoking, stress, delayed marriages, and strenuous athletic training and sports activities are resulting in rising infertility rate

VANCOUVER, BC, CANADA, August 4, 2022 /EINPresswire.com/ -- The global [assisted reproductive technology market](#) size is expected to reach USD 54.75 Billion at a steady revenue CAGR of 9.7% in 2028, according to latest analysis by Emergen Research.

Assisted Reproductive Technology (ART) market revenue growth is driven

by increasing popularity of In-Vitro Fertilization (IVF) (with or without Intracytoplasmic Sperm Injection (ICSI)) and artificial insemination, among other technologies. Infertility is a multi-faceted issue involving social, cultural, and economic implications, which may reach threatening extents in countries reporting lower fertility rates. According to statistics published by WHO, around 48 million couples and 186 million individuals live with infertility globally.

Assisted Reproductive Technology Market Size – USD 25.95 Billion in 2020, Market Growth – at a CAGR of 9.7%, Market Trends – Advancements in technology”

Emergen Research

The report is furnished with the latest updates about the current market scenario with regards to the COVID-19 pandemic. The report considers COVID-19 as a key contributor to the dynamically altered market scenario. The report also covers changing trends and market dynamics due to the pandemic and provides an accurate impact analysis of the crisis on the overall market.

The report offers these individuals a vivid description of the competitive spectrum of the global Assisted Reproductive Technology Market . The global health emergency has beleaguered the global economy, thereby disrupting this particular business domain's functioning mechanism. It assesses the present market scenario and forecasts the pandemic's aftermath in this business sector to help organizations boost their COVID-19 preparedness.

In June 2020, Ferring Pharmaceuticals announced a two-year collaboration with Igenomix for researching innovative disease mechanisms and targets discovery in conditions associated with infertility and pregnancy, such as preeclampsia, for developing groundbreaking diagnostic and therapeutic approaches for catering high unmet demand. A new hub in Boston was created which will bring experts from both companies and the focus is to investigate molecular structures, develop functional genomic systems and create tools to study embryo implantation among others.

Frozen non-donor segment revenue is expected to register a significantly rapid growth rate during the forecast period due to their established reliability and a higher success rate for pregnancy. The procedure cost is lower as compared to cycles that use fresh embryos and eggs. A frozen transfer is much simpler for both reproductive endocrinologist and patient. This procedure is also less mentally and physically stressful on a women's body.

Artificial insemination segment accounted for a significantly large revenue share in 2020 as it does not require removal of eggs from the body, and hence the procedure is far less invasive for women who are planning to conceive. In this treatment, sperm is directly placed in the uterus or cervix for achieving pregnancy. Also, the process is more cost-effective compared to IVF, as it does not require egg extraction/laboratory monitoring.

Company Segmentation

The Assisted Reproductive Technology Market report provides an exhaustive qualitative and quantitative analysis that will provide insight into the industry.

This Assisted Reproductive Technology Market insight includes data from significant participants such as marketers, industry experts, and investors.

The Assisted Reproductive Technology Market report's objective is to provide an exhaustive perspective from all stakeholders for young marketers and entrepreneurs. Trends and drivers are discussed in the Assisted Reproductive Technology Market Report. The global Assisted Reproductive Technology Market report delivers an overview of the global competitive environment. It provides details about the market, its share, and revenue. The Assisted Reproductive Technology Market research study recognizes the major growth regions, with the Asia Pacific leading during the forecast period.
