[Key Trends In The Global Wood Products Market](#)

The increasing demand for supply chain transparency and stringent government regulations on the wood industry has led to the implementation of tracking and tracing technologies. Many wood companies have implemented their own tracking systems to maintain transparency in their timber supply chain. Electronic tracking is being adopted by wood companies and government agencies over paper-based systems and technologies such as radio-frequency identification chips, barcodes and advanced traceability software are being used.

The wood products market consists of sales of wood products by entities (organizations, sole traders and partnerships) that produce products derived from wood. This industry includes businesses that produce lumber, plywood, veneers, wood containers, wood flooring, wood trusses, produced homes and prefabricated wooden buildings. Wood products production include sawing, planing, shaping, laminating, and assembling of wood products into bolts or lumber.
