NEW YORK CITY, NEW YORK, UNITED STATES, August 4, 2022

/EINPresswire.com/ -- According to the

current analysis of Reports and Data, the global [Construction Film Market](#) was valued at USD 9.6 billion in 2018 and is expected to reach USD 13.6 billion by year 2026, at a CAGR of 4.6%. Increase in global population and requirement of rapid urbanization has played a dynamic role in growth of the construction industry, which is directly driving the Construction Film Market. The boost of green building projects and rapid industrialization, especially in emerging economies Asia Pacific, are the key drivers of the global Construction Film Market. Other important drivers are aimed at reducing the carbon and Greenhouse Gas (GHG) emissions; furthermore use of plastic films in the construction industry as water barriers is also driving the market where they are used in roofing or flooring applications to provide water or frost resistance. An added feature of being a sound barrier it is used to scatter highway noise and in stadiums for better acoustics.

Construction films have excellent toughness and strength, high tensile strength, abrasion resistance, high puncture resistance, and ability to adapt to varying humidity. Being recyclable has also helped it maintain its green component status. Construction films are maintenance-free and are easy to apply. High durability and low product costs have increased their usage in green building projects.
