As per The Business Research
Company's "Calcium Carbide Global
Market Report 2022", the calcium

carbide market is expected to grow from \$13.80 billion in 2021 to \$14.49 billion in 2022 at a compound annual growth rate (CAGR) of 5.19%. The growth in the market is mainly due to the companies' resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. As per TBRC's [calcium carbide industry](#) outlook the market size is expected to reach \$18.68 billion in 2026 at a CAGR of 5.52%. Rising demand for plastic products is expected to propel the growth of the calcium carbide market.
