

# Collagen Peptide Market is Projected to Grow at a CAGR of 5.60% by 2028

*The global collagen peptide market was USD 610.7 Million in 2020 and is projected to grow at a CAGR of 5.60% from 2020 to 2028.*

NEW YORK CITY, NEW YORK, USA,  
August 5, 2022 /EINPresswire.com/ --  
According to the current analysis of Reports and Data, the global [collagen peptide market](#) was USD 610.7 Million

in 2020 and is projected to grow at a CAGR of 5.60% from 2020 to 2028. Collagen peptides are a rich source of healthy and protein nutrition. Collagen peptide is easily digestible, cold-soluble, and highly bioactive sources of collagen. These are the bioactive peptides derived from the enzymatic hydrolysis of collagen. These collagen peptides are derived by breaking down molecular bonds between individual collagen strands to peptides. Moreover, it is also one of the most commonly used food additives, especially in the confectionery industry and several dairy products, such as yogurts, cream desserts, and a varied range of low-fat dairy products and is used to enhance the texture and stability of the product.

Collagen peptides are used as cosmetic or medical products in various skin creams and treatments to diminish the appearance of wrinkles and to moisturize skin. Its production tends to decrease within the body with age, changing lifestyle habits, and an unhealthy diet. Consumers desire to include it through their diet rather than collagen peptide injections. Therefore, these products are being fortified into a variety of food & beverage products to improve their nutritional benefits and are extensively used in various applications such as dairy, sports nutrition, beverages, snacks & cereal, poultry & meat, and personal care products.

The wide applications of these foods, associated with the increasing demand for functional food & beverage and sport nutrition products, spurs the market growth. Numerous food formulations such as protein bars, protein drinks, yogurt drinks, dairy products, and various other fortified food products use them to improve the elasticity, consistency, and stability of the products along with their health benefits. However, stringent food laws for animal-sourced additives are hampering the market growth. Consumers are becoming concerned about the safety of the food and food ingredients that they eat. The diverse preservation techniques, processing

Reports And Data

technologies, and packaging methods remain important safety issues. Therefore, several food additive laws and regulations have been implemented in multiple countries, thereby limiting the growth and usage of hydrolyzed collagen substances. For instance, in March 2016, the European Commission published Regulation (EU) 2016/355, amending Annex III to Regulation (EC) no 853/2004 concerning the specific requirements for collagen, gelatin, and highly refined products of animal source intended for human consumption. North America is anticipated to account for the remarkable share of the global market, owing to the booming food & beverage industry in this region. The region is also one of the largest producer and consumer of processed food & beverage products. The major factors boosting the market in North America are the growth in health awareness among consumers and presence of key players such as Darling Ingredients and Cargill in the industry.

Further key findings from the report suggest

- By source, products derived from porcine holds the remarkable share of 37.1% in 2018. Porcine is rich in these proteins, which are considered to be steadier in comparison with proteins from other sources. Most of these products are sourced from animal tissues, as they contain a high amount of amino acids. Different methods are used to extract these proteins, which include the salting out, alkaline, acid, and enzyme methods. In June 2018, Tulip Food Company a group of Danish Crown acquired Zandbergen to meet the rising demand for bacon products in the global market
- North America is expected to grow at CAGR of 9.1% during the analysis period. The increasing demand for collagen peptide is attributed to mounting demand for functional protein.in this region,
- Darling Ingredients, Tessengerlo Group, Cargill, Kewpie Corporation, Danish Crown, Vital Proteins LLC., Kayos Naturals, Orgain, Inc., Aspen Naturals and Gelixer are some of the major players in this market. In February 2018 Darling Ingredients has introduced a new collagen peptide-based product named StabiCaps. It will help the company to broaden its collagen peptide product line.

Segments covered in the report:

This report forecasts revenue growth at a global, regional & country level, and provides an analysis of the market trends in each of the sub-segments from 2016 to 2026. For the purpose of this study, Reports and Data have segmented the collagen peptide market on the basis of source, application, and region:

Source (Revenue, USD Million; 2020-2028, and Volume Metric Tons-2028)

- Bovine hide & bones

- Porcine
- Marine
- Sheep
- Poultry
- Alternative sources (enzymes)

Application (Revenue, USD Million; 2020-2028, and Volume Metric Tons-2028)

- Pharmaceutical
  - o Biomaterials
  - o Others
- Food and Beverages
  - o Food
    - Sausages and Others
    - o Nutritional products
      - Sports nutrition
      - Dietary supplements
    - o Beverages
      - Carbonated beverages
      - Non- carbonated beverages
      - Others (alcoholic beverages and fruit juices)
    - o Dairy products
      - Cheese
      - Yogurt
      - Others (cream and ice cream)
    - o Meat & poultry products
    - o Snacks & cereal
    - o Others (bakery products, confectionery products, and desserts)
- Veterinary
- Cosmetic
  - o Anti-aging
  - o Others
- Nutraceutical
  - o Oral Collagen Supplementation
- Healthcare
  - o Wound healing
  - o Cardiac
  - o Others
- Other applications

Regional Outlook (Revenue, USD Million; 2020-2028, and Volume Metric Tons-2028)

- North America
  - o U.S.
  - o Canada

- Europe
  - oGermany
  - oFrance
  - oUK
  - oRest of Europe
- Asia Pacific
  - oChina
  - oIndia
  - oJapan
  - oRest of Asia-Pacific
- Middle East & Africa
- Latin America
  - oBrazil

## About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients to make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Products, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
