*The new book "The Final Days of Doggerland" by Mike Meier is a stone age story of survival in Northern Europe. It is in large part based on archeological facts.*

CHARLESTON, SOUTH CAROLINA, USA, August 6, 2022 /EINPresswire.com/ -- When author [Mike Meier](#) began researching his third book, a [Neolithic](#) novel set in [Doggerland](#), the land that once connected Northern Europe to what is now England, he was fascinated to discover several enlightening archeological facts, such as the migration of the Yamnaya people, the use of spices in food, and a land

sinking into the sea. Meier's historic tale begins during the time of the early westward migrations from the Pontic steppe between the Southern Bug, Dniester and Ural rivers. "I have tried to create a world as it was 6,000 ago in Northern Europe," Meier notes. "A time where one's only goal was to survive."

In "The Final Days of Doggerland," a group of weary nomads arrive in Northwestern Europe in the remnants of Doggerland and attempt to build a home. But the women and children of the group become captives of the more skilled Bolleborg tribe, led by a ruthless chief, Viggo. One of the captives, Oane, relies on her talent for crafting poisons to survive, while pondering how to reach firm land in the west. But her planned escape may come with a price.

"Imagine if your biggest worry was not your next social media post or who wins the election, but simply survival," Meier posits. "And with survival as your biggest worry, the only other thing you may be able to think of, if you ever find the time, would be your purpose in life."
