Global drinks packaging market is segmented on the basis of material, packaging type and application. The growth amongst these segments will help you analyse meagre growth segments in the industries, and provide the users with valuable market overview and market insights to help them in making strategic decisions for identification of core market applications.

On the basis of material, the drinks packaging market is segmented into glass, plastics, metal, paperboard and others.

On the basis of packaging type, the drinks packaging market is segmented into box, bottle, cartons, cans, pouch, jars and others.

Based on application, the drinks packaging market is segmented into carbonated drinks, alcoholic beverages, bottled water, milk, fruit and vegetable juices, energy drinks, plant-based drinks and other applications.

Rising demand for bottled water owing to increasing travel and tourism is driving the growth in its market value. Growing demand for sustainable and convenient packaging solution will further expand the demand for drinks packaging solutions globally. Rising technological advancements in the packaging solutions technology and functionality designs will further induce growth in the demand for drinks packaging. Increasing usage of stand-up pouches and bag-in-box packaging solutions for both alcoholic and non-alcoholic beverages will indirectly promote the market growth rate. Growth and expansion of beverages industry globally is another important factor propelling growth in the demand for drinks packaging solutions.

However, stringent regulations imposed on the disposal of plastics in regards to rising environmental concerns will create hindrances in of drinks packaging market growth. Fluctuations or volatility in the prices of raw materials will again challenge the drinks packaging market growth rate.
