

# Aircraft Cabin Lighting Market : line fit to Rise at CAGR 5.2% by 2026

PORTLAND, ORAGON, UNITED STATES, August 8, 2022 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Aircraft Cabin Lighting Market](https://www.alliedmarketresearch.com/request-sample/2134) by Type, Fit, and Aircraft: Global Opportunity Analysis and Industry Forecast, 2019-2026," the market was valued at \$1,167.50 million in 2018, and is projected to reach \$1,740.00 million by 2026, growing at a CAGR of 5.2% from 2019 to 2026.

Aircraft cabin refers to the part of the aircraft in which passengers travel. In recent years, different technological developments have been witnessed in the airlines industry. In addition, advanced aircraft cabin lighting systems help in saving the fuel consumption of the aircraft. In addition, these lights increase the attractiveness of the aircraft.

The increase in number of passengers, high demand for retro fit traditional light, and new aircraft demand are the factors that drive the global market growth. Rising demand for repair and overhaul services for aircraft lighting is positively affecting the aircraft cabin lighting market. However, lack of profitable airlines in emerging economies is estimated to restrain the market growth. In addition, alternative modes of transport and airline order backlogs are hampering the aircraft cabin lighting market growth.

Based on type, the aircraft cabin lighting market is segmented into emergency lighting and ordinance signs, lavatory lights, reading & dome lights, specialty lighting, and wash lighting. Emergency lightings and ordinance signs are used to indicate the safety procedures and protocols during critical situations. Lavatory lights are used in commercial aircrafts to inform about the availability of lavatory. Reading & dome lights provide optimal reading conditions in high-ceiling cabins. Specialty lighting is used in aircraft cabin areas such as galley and lavatories. Wash lighting makes it easier for travelers to sleep, give the airplane a restaurant feel during meal time, and decreases jet lag.
