

Stockwell Elastomerics Announces ESS4772 Ultra-Thin Platinum Cured Silicone Sheets Now Available

Stockwell Elastomerics announces the availability of ESS4722, a new product family of ultra-thin platinum cured solid silicone.

PHILADELPHIA, PA, UNITED STATES, August 9, 2022 /EINPresswire.com/ -- Stockwell Elastomerics announces the availability of ESS4722, a new product family of [ultra-thin platinum cured solid silicone](#). It is immediately available in 20A, 30A, and 40A durometer. Due to the significant demand for high performance silicone products, Stockwell Elastomerics developed this product with design engineering customers in the advanced/emerging technology sector in mind.

ESS4722 ultra-thin platinum cured solid silicone samples

These materials offer the performance properties expected in silicone, with the added benefit of low closure force and thin gauge. Design and manufacturing engineers seeking a soft, resilient gasket material that performs well in temperatures from -70°F to 450°F benefit from these thin solid silicone products. Engineers seeking last-minute solutions with minimal design changes will appreciate the thinner options as well. The low durometer of these materials help reduce buckling issues, often preventing the need for expensive enclosure/bolt pattern changes.

Stockwell Elastomerics developed ESS4722 solid silicone for customers with last minute design issues in mind, though these products work in any space constrained design when reliability is paramount. These materials are capable of IP-67 level sealing with the proper housing design. Due to the longevity and compression set resistance of silicone, enclosures can be open/closed over the life of the product without concern of seal failure. Stockwell Elastomerics can also provide this ESS4722 material with a high performance silicone or fully acrylic adhesive as an

assembly aid if desired.

Customers may request complimentary sample swatches of solid silicone with or without adhesive to evaluate. The [ESS4722 sample request form](#) and availability chart can be accessed online at <https://www.stockwell.com/request-ess4722-samples/>.

“This ESS4722 platinum cured solid silicone product will help many engineers solve complex sealing, cushioning, and other design problems,” said Dan Shanahan, Director of Applications Engineering. “Its immediate availability and our strong inventory position will help buyers and companies dealing with supply chain issues.”

Three different durometers of low durometer [ESS4722 platinum-cured, high consistency rubber \(HCR\) solid silicone](#) have been selected for the current offering:

- ESS4722-20 – 20A durometer, black, with low oil migration. Used in low closure force applications. Available in thicknesses from 0.010” – 0.093”. Can be provided in various configurations with a variety of adhesives.
- ESS4722-30 – 30A durometer, off-white. Available in thicknesses from 0.010” – 0.093”.
- ESS4722-40 – 40A durometer, translucent (unpigmented). Used when needing to see through the material is important. Available in thicknesses from 0.010” – 0.093”.

“

This ESS4722 platinum cured solid silicone product will help engineers solve complex sealing and cushioning design problems with its immediate availability and our strong inventory position.”

Dan Shanahan, Director of Applications Engineering

About Stockwell Elastomerics, Inc.

Stockwell Elastomerics provides high performance gaskets and materials, using silicone rubber, fluorosilicone, and similar high performance elastomers to solve design and

manufacturing challenges. Its customer base includes companies in the North American technology sector who utilize the company's innovation and responsiveness to bring their products to market more quickly. Key markets include medical diagnostic equipment, ruggedized portable devices, aerospace and defense, airflow management, alternative energy and analytical

instrumentation. The company became an ESOP in 2017. Stockwell Elastomerics is ISO 9001:2015 registered. For complete information on Stockwell Elastomerics' products, manufacturing capabilities and industries served, please visit <https://www.stockwell.com>.
