The agricultural pheromones market consists of sales of the agricultural pheromones by entities (organizations, sole traders, and partnerships) that are chemical substances generated by animals and insects that aid in social interaction. These pheromones are released by insects to find food and attract partners. Synthetic pheromones are used to change the behavior of pests and are used to trap insects or pests that destroy crops.

Global [Agricultural Pheromones Market Trends](#)

Technological advancement is one of the key agricultural pheromones industry trends. Technological advancement is the discovery of knowledge that helps in developing products using technology. In 2022, Provivi a US-based biotechnology company, and Syngenta a Switzerland-based agrichemical company, launched pheromone-based Nelvium to control detrimental rice pests. This Nelvium pheromone solution helps in controlling the pest. This innovation has been applied in Indonesia for crop protection.
