The wireless display market consists of sales of wireless displays by entities (organizations, sole traders, and partnerships) that manufacture wireless display devices that are used to share content from a device to the display without being connected to the display by way of a video cable. A wireless display is a kind of technology that enables the display of content from a phone or a computer on a TV or projector without a video cable. They are widely used for mirroring content and online streaming in residential applications.

## [Global Wireless Display Market Trends](#)

Companies are focusing on launching various new products or devices to attract more customers which is shaping the wireless display market outlook. A product is a coordinated and planned effort to introduce a new product to the market and make it available for purchase. For example, in October 2021, BenQ, a Taiwan-based company engaged in selling and marketing technology products, launched a smart wireless portable projector having 2.1 channel speakers, curved ultra-wide entertainment monitors, and MobiuZ-series gaming monitors. Similarly, in August 2019, PremiumAV, an India-based software company, launched a Wi-Fi HDMI Dongle Wireless Display. It is designed to offer high-performing wireless display technology, along with
