Key Points of Security information and event management Market:

The retail and e-commerce segment revenue is expected to increase at a steady rate over the forecast period due to the rising concern to secure e-commerce data, and personal and financial information of the customers. Retail sector is the main target for hackers due to the large amount of monetary transactions taking place in this sector via, debit cards, credit cards, and other payment systems.

The Small and Medium-sized Enterprises (SMEs) segment is expected to register a steady revenue growth rate over the forecast period due to the rising adoption of cloud-based services among SMEs, which creates high demand for security information and event management among these enterprises.

The market in North America is accounted for largest revenue share in the global security information and event management market in 2021 due to the rising concerns of cyberattacks in countries across the region, especially in the U.S. and Canada.
