The global [cancer therapeutics market size](#) was valued at \$98,900 million in 2018, and is projected to reach \$180,193 million by 2026, at a CAGR of 7.7% from 2019-2026. The market is driven by factors such as development of novel cancer therapeutics and surge in cancer awareness & availability of oncology drugs in the developing markets.

Surge in geriatric population and rise in the number of collaborations & partnerships to facilitate drug development are the key drivers of the global cancer therapeutics market. In addition, heavy inflow of investment in R&D activities has enhanced the development of cancer therapeutics. Furthermore, favorable government regulations for cancer therapeutics and surge in cancer prevalence boost the market. The high demand for personalized medicine along with high potential of emerging economies provide lucrative opportunities to the market. However,

adverse effects related to cancer therapeutics and high costs associated with oncology drugs impede the growth of the cancer therapeutics market.
