Polycarbonate Panels Overview :-

The polycarbonate panels market size was relatively larger than that of the previous year and revenue is expected to register a CAGR of 4.6% between 2022 and 2030. Rising demand for these panels from construction and transportation industries is a primary factor driving market revenue growth. Also, the superior properties of polycarbonate panels such as durability and high impact resistance are other factors projected to drive market revenue growth during the forecast period.

Another key factor driving revenue growth is high preference for polycarbonate panels over conventional materials such as glass and acrylics, owing to the multiple advantages offered. Also, the lightweight nature of these panels is driving popularity in various end-use industries and application areas are expected to continue to drive market revenue growth. Solid polycarbonate panels are in high demand on account of their wide range of applications in various industries.

Moreover, easy availability and low cost associated with solid polycarbonate panels are projected to fuel demand in both developed and developing economies.

However, revenue growth of the polycarbonate panels market is being hampered by some factors. Some include high raw material costs and volatile prices of crude oil. Moreover, stringent environmental regulations regarding the production of polycarbonate panels are other factors expected to hamper market growth to some extent.
