*Market Size – USD 5,042.4 Million in 2020, Market Growth - CAGR of 22%*

NEW YORK CITY, NEW YORK, USA, August 10, 2022 /EINPresswire.com/ --

The global [Disaster Recovery as a Service \(DRaaS\) market](#) is forecast to reach USD 25.29 Billion by 2028, according to a new report by Reports and Data. Disaster recovery as a service (DRaaS) is a backup service and

cloud computing model that uses the resources of the cloud to protect data and applications from the disruption caused by disaster. DRaaS provides an organization a backup system that permits business continuity in case of any system failure.

DRaaS is also known as business continuity as a service (BCaaS) and is offered with a business continuity plan (BCP) or disaster recovery plan (DRP). DRaaS ensures complete replication and backup of all cloud data while serving as a secondary infrastructure. It allows an organization to continue with daily business processes while the existing one undergoes repair. DRaaS permits these applications to run on virtual machines without any real disaster.

North America led the market with a share of 32.1% in the year 2026. The United States has been at the forefront as an early adopter for the latest technologies and software to manage customer care. The region dominated the global market owing to the high awareness and high demand for the implementation of the recovery-as-a-service providers.
