COVID-19 impact analysis:

The outbreak of the COVID-19 pandemic left a significant impact on the global economy. The construction chemicals market report provides a detailed study of the micro- and macro-

economic impacts of the pandemic. Moreover, the analysis depicts the direct impact of COVID-19 on the construction chemicals market. It recapitulates the detailed information about the market extent and shares owing to the impact of the outbreak. The report also emphasizes on the supply chain and the sales of the construction chemicals market. Last but not the least; the study also exhibits a post-COVID-19 scenario, portraying different measures and initiatives taken by the government bodies across the world.

The construction chemicals market is further segmented into concrete admixtures, sealants & adhesives, water proofing & roofing, repair, flooring, and others. Among these sub-segments, the concrete admixtures and water proofing & roofing segments together held the largest market share of the market in 2018, contributing to nearly two-thirds of the total market share. However, the concrete admixtures segment is estimated to maintain its fastest growth rate by 2026, owing to increase in consumption in developing nations in the Asia-Pacific region along with huge number of construction projects.

Some ruling enterprises in the global construction chemicals market are examined in the report along with the citation of innovative product launches by them, their collaborative undertakings & endeavors, several merges & acquisitions, and many more. The frontrunners operating in the global construction chemicals industry include BASF SE, Ashland Inc., Arkema SA, Mapie S.p.A, Fosroc International Limited, RPM International Inc., Pidilite Industries.

The research analyzes the report into segments including concrete admixtures, water proofing & roofing, flooring, repair, sealants & adhesives, and others. Among these, the concrete admixtures and water proofing & roofing segments together accounted the highest market share of the global construction chemicals market in 2018, accounting for nearly two-thirds of the total share. However, the concrete admixtures segment is expected to grow at the fastest growth rate by 2026, owing to rise in consumption from developing countries in Asia-Pacific with large number of infrastructure projects undertaken.

Major Inclusions-

- Qualitative as well as quantitative assessment of the market on the basis of the detailed categorization involving both the economic and non-economic factors.
- Analysis at country and regional level, which portrays the share of the product or service in different regions.
- Elaborative company profiles section, which provides different pointers such as key executives, business enactment, company overview, product/service portfolio, R&D expenditure, current scenario, and prime strategies of the key market players.
- The forecasted market outlook of the construction chemicals market based on recent developments, which incorporate the analysis of drivers, market trends, and growth

opportunities.

- The COVID-19 impact on the construction chemicals market
- Post-sales support and free customization
