

Vortex is a bullseye for any event

Take turns hitting the target or play simultaneously, allowing for a level of excitement that similar games simply can't replicate.

OKLAHOMA CITY , OKLAHOMA , USA ,
August 12, 2022 /EINPresswire.com/ --
After a couple of years of quarantine,
now begins the perfect time for us to
get back into the social swing of things.

Summer is here, and that means
backyard barbecues, birthday parties,
camping trips and all kinds of fun
events.

But by now, most of us might be
feeling worn out, while all of our games
are probably feeling played out.
Looking to add more fun to
recreational events? Vortex is here to be a game-changer, and we are all on the lookout for
potential investors or licensee to help us start the party.

Vortex is an IdeaPros Certified Partner.

“I wasn’t actually trying to invent a game at all - I was just looking for a simple, new hobby to get into,” explains Oklahoma City inventor and developer Chad Hutson.

“

I wasn’t actually trying to
invent a game at all - I was
just looking for a simple,
new hobby to get into.”

Chad Hutson, Vortex

“I was interested in origami, so I was looking on the internet for something similar, where I could play with 3D shapes. When I saw the shape that would soon become Vortex, I noticed that if the targets were on the sides and have it rotate on bearings, and make it a Velcro surface - it

could create an amazing target game.”

Everyone's life isn't flat, so why should games be?

Vortex is a darts-like game based on a 3-dimensional shape known as the truncated cuboctahedron, which has 72 different edges and faces of all different shapes and sizes. While saying “truncated cuboctahedron” three times fast may be difficult, the game could not be easier to understand. Score points by hitting the numbers shown on the moving target. The higher the number the better your score.

As the Velcro balls stick to the target, their weight will cause the target to rotate and spin in different ways, adding even more dimension to this 3-dimensional play experience.

“Users can take turns hitting the target or play simultaneously, allowing for a level of excitement that similar games simply can’t replicate,” explains Hutson.

Vortex comes with 12 light Velcro balls, 2 heavy Velcro balls, and the truncated cuboctahedron surface target.

Vortex scraps the razor-sharp darts or ineffective magnets you may be used to, ensuring a completely safe experience for children of all ages (and adults who may have had one too many servings from the punch bowl).

“The game can be used indoors or outdoors, and allows for three different game positions - floor, mounted parallel on wall, and mounted perpendicular on wall, perfectly suiting any space you may want to play in,” says Hutson.

Invest in a new game that anyone and everyone can play and enjoy. Let’s make a deal, and let the games begin.
