Stoma/Ostomy Care Market Scenario

Stoma can be defined as the end of a catheter or ureter that is surgically placed in patients replacing the use of bladder or bowel due to the case of bladder, bowel cancer or Crohn's

disease. It is an opening created in the patient's body for the proper disposal of body wastes and replacement of excreting organs.

Growing number of awareness programs to educate patients regarding the use of ostomy products is the vital factor escalating the market growth, also rising favorable reimbursement system in developed countries, increasing geriatric population and rise in number of patients suffering from colorectal cancer and defective bladder, increasing ostomy surgeries of the bowel, are the major factors among others driving the stoma/ostomy care market.

However, rising discomfort and other issues associated with the use of ostomy bags and rising adoption of alternative treatments are the major factors among others which will obstruct the market growth, while rising disparities in reimbursement for ostomy supplies in emerging countries will further challenge the growth of stoma/ostomy care market in the forecast period mentioned above.
