The hemp fiber market consists of sales of hemp fiber by entities (organizations, sole traders, and partnerships) that are used in the manufacture of fiberboard, compost, and animal bedding. Hemp fiber refers to a natural plant fiber that comes from the stems of plants such as linen and bamboo. This fiber is environmentally friendly and causes a less harmful environmental impact. These materials also have inherent mechanical, thermal, and acoustic properties.

[Global Hemp Fiber Market Trends](#)

New product innovations have emerged as one of the key hemp fiber market trends gaining popularity. Major companies operating in the hemp fiber sector are focused on introducing product innovations to sustain their position. For instance, in June 2020, Precision Extraction, a US-based manufacturer of hemp extraction equipment, launched the CRS 2000 (CryoMass Refinement System), which is a solvent-free harvesting and refining system. It is used for both drying and purifying biomass from cannabis and hemp plants at a rate of up to 600,000 grams per hour. CRS 2000 drastically increases solvent-based cannabis and hemp, which helps to increase extraction volume by up to 400%.

[Global Hemp Fiber Market Segments](#)

The global hemp fiber market is segmented:

By Type: Long (bast) Fibers, Short (core) Fibers

By Source: Organic, Conventional

By Application: Food, Beverages, Personal Care Products, Textiles, Pharmaceuticals, Others

By Geography: The global hemp fiber market report is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, North America accounts for the largest share.
