The auto-dimming mirror market consists of sales of auto-dimming mirrors by entities (organizations, sole traders, and partnerships) that are used to improve visibility and safety at night while driving. Auto-dimming mirrors are made up of a mirror and an electronic system that uses photo sensors to detect light from the front and back. These mirrors can dim the light reflecting from their surface by considerably reducing the glare of light from following vehicles on busy routes at night.

Global Auto-Dimming Mirror Market Trends

Technological innovations have emerged as the key trend gaining popularity in the auto-dimming market. Major companies operating in the auto-dimming sector are focused on introducing new technologies to sustain their position in the market.
