Covid-19 scenario analysis:

Coronavirus disease 2019 (COVID-19) has created an economic crisis along with a health care crisis. COVID-19 pandemic has stretched healthcare system worldwide, developed countries are expected to cause economic recession. The COVID-19 pandemic has an adverse impact on the healthcare system, resulting in 50% to 70% drop in revenue from March. Many small hospitals, clinics and nursing homes, have been forced to shut their operations. As a result of social distancing and localized curfews have resulted in delayed elective surgical procedures. In

addition, visa cancellations have led to a hiatus in medical tourism and can negatively impact the healthcare services market growth.

Top impacting factors: Market Scenario Analysis, Trends, Drivers and Impact Analysis

Post-treatment services are categorized under social insurance consumption where the expense is caused by the patients for the insurance coverage. Because of these variables individuals are spending more on treatment which empowers them to profit the modern patient consideration as well as home-care administrations which is driving the [wheelchairs market](#) growth.

There has been an expansion in offers on the items like manual and controlled wheelchairs because of the increase in the number of patient consideration services upheld by individuals. The factors include industrial accidents, outdoor accidents, natural calamities, fire breakout and others leads to the rise in medical emergencies. Medical facilities are expanding their capacity for attending more emergency situations and healthcare casualties and these factors are influencing the growth. The increasing cases of medical emergencies the healthcare services are focusing on hiring more people and expanding the operation theaters. Powdered wheelchairs and manual wheelchairs are provided by global players as well as local players. Increasing supply leads to increase the revenue and share of global wheelchair market.
